Requirement Analysis

Data Flow Diagram & User Stories

Date	28 September 2026
Student Name	Mohamed Radhuwan
Project Name	Metro Ticket Generating System in ServiceNow
Maximum Marks	

Logical Data Flow

Step	Flow
1	Passenger opens the ticket booking Service Catalog item.
2	Selects Source, Destination, Passenger Type and Number of Tickets.
3	Catalog client scripts and UI policies auto-populate defaults (single / return journey).
4	Client-side and server-side validation checks mandatory fields, station values and travel date.
5	Fare Logic Script calculates the fare and confirms the fare match.
6	QR code is generated and the digital ticket record is created.
7	Flow Designer sends a Notification with the digital ticket.
